Reception Class Create Roarsome Dinosaur Habitats!

This half term, our Reception children have been busy becoming mini palaeontologists at home! For their home learning project, they were challenged to design and create their very own dinosaur habitats — and what an incredible job they've done!

Using materials like cardboard boxes, twigs, leaves, pebbles, and even playdough, the children brought their prehistoric worlds to life. From towering volcanoes to lush forests and muddy swamps, each habitat showed creativity, care, and a brilliant understanding of what dinosaurs might have needed to survive.

Thank you to all the families who supported this project — your encouragement helped our young learners roar with enthusiasm! We can't wait to see what the next home learning adventure will bring.

Year 2 Make Musical Magic!

This term, our Year 2 students have been diving into the world of rhythm and melody through exciting music activities! They've been tapping, clapping, and keeping in time with the beat, all while learning to play notes on the glockenspiel.

By following musical notation, they're not only developing their timing and coordination but also building the confidence to perform simple songs. It's been a joy to see their enthusiasm and musical talents shine — we may have some future composers in the making!
